

ENTRY DEADLINE: 20 NOVEMBER 2020

DIABETES CARE INITIATIVE OF THE YEAR

The delivery of diabetes services to patients has evolved with new and innovative treatments, technologies and pathways. Where and when people receive care has been changing. Brining patients closer to their care is important in reducing inefficiencies and providing more control. System led approaches have also changed the way treatment has been delivered.

Prevention initiatives working across organisational boundaries especially in terms of population health and working with primary and community environments. Combined these new approaches are adding value to the service, reducing attendance and saving money.

This award will recognise NHS and public sector organisations and local care economies that are making progress on diabetes care and prevention. Our judges will be looking for teams who can prove that a change in approach has significantly bolstered the quality of care, and so improved financial value and patient experience. Judges will also be looking for integrated initiatives of prevention and treatment.

Eligibility

Entrants for this award will be any organisation from the NHS, general practice, community and primary care as well as other public sector bodies making things better.

JUDGING CRITERIA

Ambition

- Provide a clear rationale for the initiative including the context of care provision
- Explain how the initiative aimed to improve the care of people with diabetes, and simultaneously improve financial value and efficiency – this can also be related to a preventative initiative
- Explain how the initiative was informed by existing best practice or evidence
- Include any relation to objectives set by bodies driving better practice

Outcome

- Evidence that the initiative has led to an improvement in patient care, and a resulting improvement in value for the local care economy.
- This must include a quantitative aspect but can also include qualitative measures such as patient feedback.
- How has the initiative better allocated resources on care and prevention?
- What has been the result for the patient experience including any reduction in variation?

WHY WAS LAST YEAR'S WINNER SUCCESSFUL?

The judges felt that this was an extremely important project and much needed for young people in the community. This project demonstrated excellent outreach to a mix of young people and young adults attending the course. Learning about diabetes mixed in with the everyday events that they do on the course allowed these young people to put the learning into practice.

2020 Winners
Guy's and St Thomas' FT

VIEW THE 2020 SHOWCASE

Spread

- Discuss the initiatives undertaken to share learning across departments, teams and organisation which have resulted in tangible improvements.
- What efforts are being made to share results?

Value

- Provide clear evidence the initiative has improved value.
- Show how the initiative has simultaneously delivered financial savings and improved patient experience – creating value for taxpayers and patients alike.
- Consider the impacts of the initiative on reducing attendance and bringing care closer to the patient
- Provide testimonials from patients and stakeholders to help support the entry.

Involvement

- Provide clear evidence surrounding the consultative measures taken to inform, involve and enable participation in the design of the initiative
- Display how all relevant parties were involved in the initiative, including patients, collaborating organisations, key stakeholders and staff.
- Show how the initiative has supported patients to safely self-care wherever appropriate
- Demonstrate how strong partnerships across a care economy have been developed, including with the third sector as appropriate
